Hinges: external
Door opening angle: 180°
Mounting holes: 2 in the bottom and 2 in the back wall
Colour: RAL 7035 light gray

A series of gun safes designed for storing both hunting and sporting weapons.

The specific feature of this model is hidden locker at the bottom of the safe. The locker is closed with the bottom with imitation of anchoring hole and foam carpet. Proper anchoring hole is located in the bottom of the safe.

Special safe construction - door - of height shorter than the entire safe height, allows the location of the safe in the „deepen” properly prepared base surface or the wardrobe with threshold - due to this measure it is possible to give the effect of hidden locker. The safe, which is in fact 1500mm high, is visible at height of 1300 mm (dependent upon the so called recessing the safe in the floor)

The safe is equipped with two functional and height-adjustable shelves.

On the inside door cover there is a hook bar for hanging keys, binoculars and other items of everyday use.

The innovative use of movable rifle holders on metal rail on magnet, allows to locate the rifle holders anywhere in the safe, either on the side or back walls as well as on any height.

A split weapon rail was used for greater convenience of use. Thanks to this procedure, even the shortest weapons will be able to be properly and safely placed in the safe.

Weapon holders mounted on magnets can be used to position short weapons.
