GOODS IN STOCK

Safes available with key and electronic locks.

RAL 7035 or RAL 7024 - other colours on request only.

Option with left hinges **with no surcharge.**

Product description

Body: single-walled body
Door: double-walled door construction
Locking: 4-way locking bolt system - incl. overlapping profile on the hinge side

Standard option

Lock: high security lock I class VdS/IMP class A with two keys (65 mm)
Boltwork handle: handle, protruding 60 mm
Hinges: internal
Door opening angle: 180°
Mounting holes: 2 in the bottom and 2 in the back wall
Colour: RAL 7035 light gray and RAL7024 dark gray

A series of gun safes designed for storing both hunting and sporting weapons.

The equipment of the sports shooting enthusiast or the hunter is not only a weapon, but also everything related to it. The **Siegen Super Series** and the **Siegen Super Kombi Series** were developed to store all the accessories that make up the enthusiast's equipment.

A new feature of the Siegen Super and the Siegen Super Kombi series is that the cabinets are equipped with **lighting**.

Specific feature of the series is richly equipped interior as well as refined details of equipment as:

Highly functional height/width-adjustable weapon holders

- Pull-out unit - with pull-out floor which allows easier access to stored weapons

The lower part is used for a 'secret compartment' that is visible when the pull-out unit is slide out - the handle on the front of the unit will be helpful.

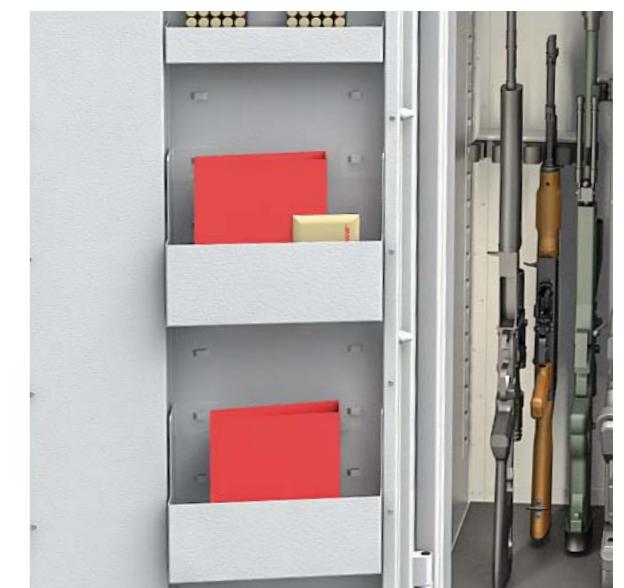

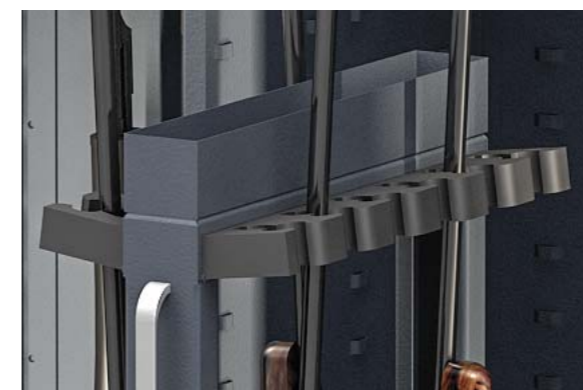

- perforation on the walls to make use of the so-called "dead" area of the back or side walls. Numerous free-hanging storage boxes allow the creation of an individual organizer to store items.

- maximum usage of space on door - **height-adjustable storage boxes** with or without ramrod holders as well as container for storing documents.

The **functionality of the pull-out unit** is not only about convenient access to the weapon placed in the 65 mm spaced foam holders, but also about maximizing the use of space. The design of the pull-out unit allows for the **storage of weapons with scopes**.

At the top there is a storage box for one of the many shooting gadgets.

Pictograms are not technical description of the product.

Model
Siegen Super
Siegen Super Kombi

- movable wall for weapon with height-adjustable rail and storage box

- height-adjustable shelves with short-gun holders. Adjustable shelves, regulate the usable height inside the safe.

The partition walls inside the safe allow to organize the space according to individual demands.

Model
Siegen Super
Siegen Super Kombi

By adjusting the height of the shelves as well as the weapon holders - the interior can be personalized at will, allowing weapons of different heights to be conveniently positioned.

On the door inside the safe there is a hook bar for hanging keys.

Two rows of weapon holders. The use of innovative **adjustable gun holders on a metal rail, fixed with a magnet**, allows them to be positioned at any height on the back wall or side walls.

Holders on adjustable rails with two types of foam holders - gauge 55mm and 65mm, are height - and depth - adjustable.

For greater convenience of use, the rail is split, due to which even the shortest gun can be properly and safely stored in the safe.

Weapon holders attached by magnets can be used to position short- guns. Depending on the model - **Siegen Super** and **Siegen Super Kombi** cabinets have individual equipment which enables to select a model according to personal needs.

Each safe equipped with foam carpet at the bottom.

SIEGEN SUPER Kombi
